DETAILED ACTION

Acknowledgment is made of the receipt of the preliminary amendment filed on 5/22/01.

Claims 1-30 are currently pending.

Claim Objections

1. Claims 19 and 29 are objected to because of the following informalities:

in claim 19, line 3, substitute “is” with --in--; and

in claim 29, line 3, substitute “capable of” with --for--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Russell et al. (US 5,609,827) (hereinafter referred to as ‘Russell’).

Russell teaches a transparent biopsy specimen container 10 with a plastic body 13, lid 14, and a seal 22 between lid 14 and body 13 to provide for safe handling of body tissues and body liquids enclosed therein. The entire container 10 can be radiographed to analyze the tissue inside. Numerical indicia is provided on an indicia ring 32 to identify four peripheral components within the container 10 in order to allow correct placement of a core specimen in accord with biopsy location (col. 3, lines 47-57 and col. 4, line 54-col. 5, line 15).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Greenwald et al. (US 6,330,106) teach a tissue specimen holder.

Eastman et al. (US 6,411,434) teach a cassette for facilitating optical sectioning of a retained tissue specimen.
